

ARTEMIS RESEARCH

MITIGATE RISK WITH ARTEMIS RESEARCH. The world is a risky place. Partners mislead. Export laws change. Global conflict upends entire value chains. We arm our clients with vital insight to anticipate and overcome these challenges. We unravel complex regulations and distill trade implications from geopolitical trends. We illuminate illicit actors in a sea of data, employing innovative searches to uncover threats to your enterprise. Finally, we understand the nuances of science, trade, and government, and are fluent in the technical language of the clients we serve.

Our Company: We are a boutique business intelligence and risk assessment firm specializing in the technology export industry. We provide research, analysis, and consulting services to help technology suppliers identify lower-risk export markets, and reduce costs, liability, and risk to professional reputation resulting from inadvertent export law violations. We employ a primary specialist and cadre of independent consultants to ensure a specialized team tailored to each client's needs.

Our Experience: We offer over 15 years of US Government experience providing expert guidance in export control and IP theft investigations, advising on the security implications of technology trends and promoting more effective due diligence, supply chain protection, and personnel reliability programs. Areas of expertise include sanctions evasion, illicit shipping networks, threat finance, export controls, IP protection, counterproliferation, and emerging technology.

Reasons for Business Intelligence in the Technology Sector:

- Supply Chain Surety
- Tariffs and Trade Restrictions
- Regulatory Compliance
- Geopolitical Instability
- Business Continuity Planning

Artemis Research Provides:

- Business Intelligence on Suppliers, Customers, Contractors, and Partners
- Training and Advising on Export Controls and Countering Sanctions Evasion
- Value Chain Mapping and Analysis
- Geopolitical Risk Assessment
- Regulatory Compliance Monitoring
- Scenario Planning and Crisis Response
